“Hu Tai-Li's *Voices of Orchid Island* (1993), which juxtaposed three related stories of how the Yami people cope with pressures from mainland Taiwan, opened with a direct challenge to ethnographic film from one of the subjects, 'We tend to feel that the more anthropologists come here, the deeper the harm they do to the Yami'. The rest of this provocative 16mm feature film explored how the island inhabitants struggle with tourist photography, medical care, and nuclear waste disposal.”
